

CBAT-Maintenance Training

Scope

- Developed Aircraft Survivability Equipment (ASE) maintenance training on five aircraft platforms and five associated ASE systems
- Developed Computer Managed Instruction (CMI) program to manage student course usage in the U.S. Army Aviation Logistics Schools
- Simulated Maintenance Operations Checklist (MOC) procedures training

Highlights

- Produced level IV interactive MOC simulations that allow students to free-play across 150+ aircraft setup steps
- Integrated interactive 3D environments with drag and drop exercises
- Created classroom-based and stand-alone web downloadable versions

ISO 9001:2008 CERTIFIED
