

San Jose International Airport 3D Visual Database

Scope

- 3D visual database produced to support FAA Air Traffic Control simulation-based training device
- 2D file manipulation, terrain production, 3D model development, texturing, and visual database assembly

Highlights

- Integrated software applications and demonstrated improved quality and timeliness for production of FAA databases
- Delivered cost-effective, relevant, and integrated solution to support performance of the ATC simulator

ISO 9001:2008 CERTIFIED
